

Rallo Logistics Services

We are a family business, with more than 40 years of history in the logistics sector.

We have gone along with our clients during this time, analyzing their needs and adding value to their supply chain.

Integral Logistics Services

Today, more than ever, logistics operators are a necessary link in the supply chain, a strategic partner.

We offer integral logistics services, which include from the collection of raw materials, transport, storage and distribution, all with our own and integrated resources that allow us to guarantee the traceability, quality and control of goods.

A large industrial storage facility, likely a grain elevator or silo, filled with massive piles of brown material, possibly grain or wood chips. The structure is made of concrete and steel, with a high ceiling and large windows. Sunlight streams in from the windows, creating a dramatic effect with rays of light. A yellow excavator bucket is visible in the foreground, partially buried in the material. The overall atmosphere is one of scale and industrial activity.

Services

Storage

We boast our own facilities,
a Logistics Center located in the middle of
the Mediterranean corridor and surrounded
by high-speed connections, with an optimal
structural design and associated services
for carrying out logistics activity.

Multi-use facilities fitted for bulk products
and manufactured storage.
